e360™

THERMAL POOL CIRCULATION SYSTEM

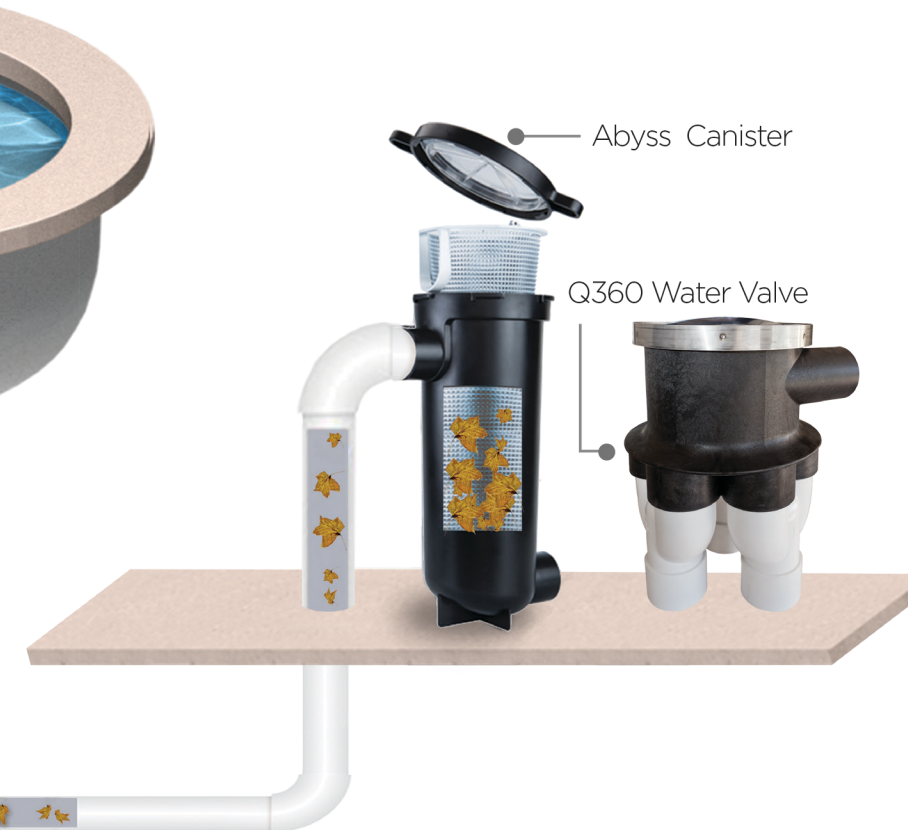

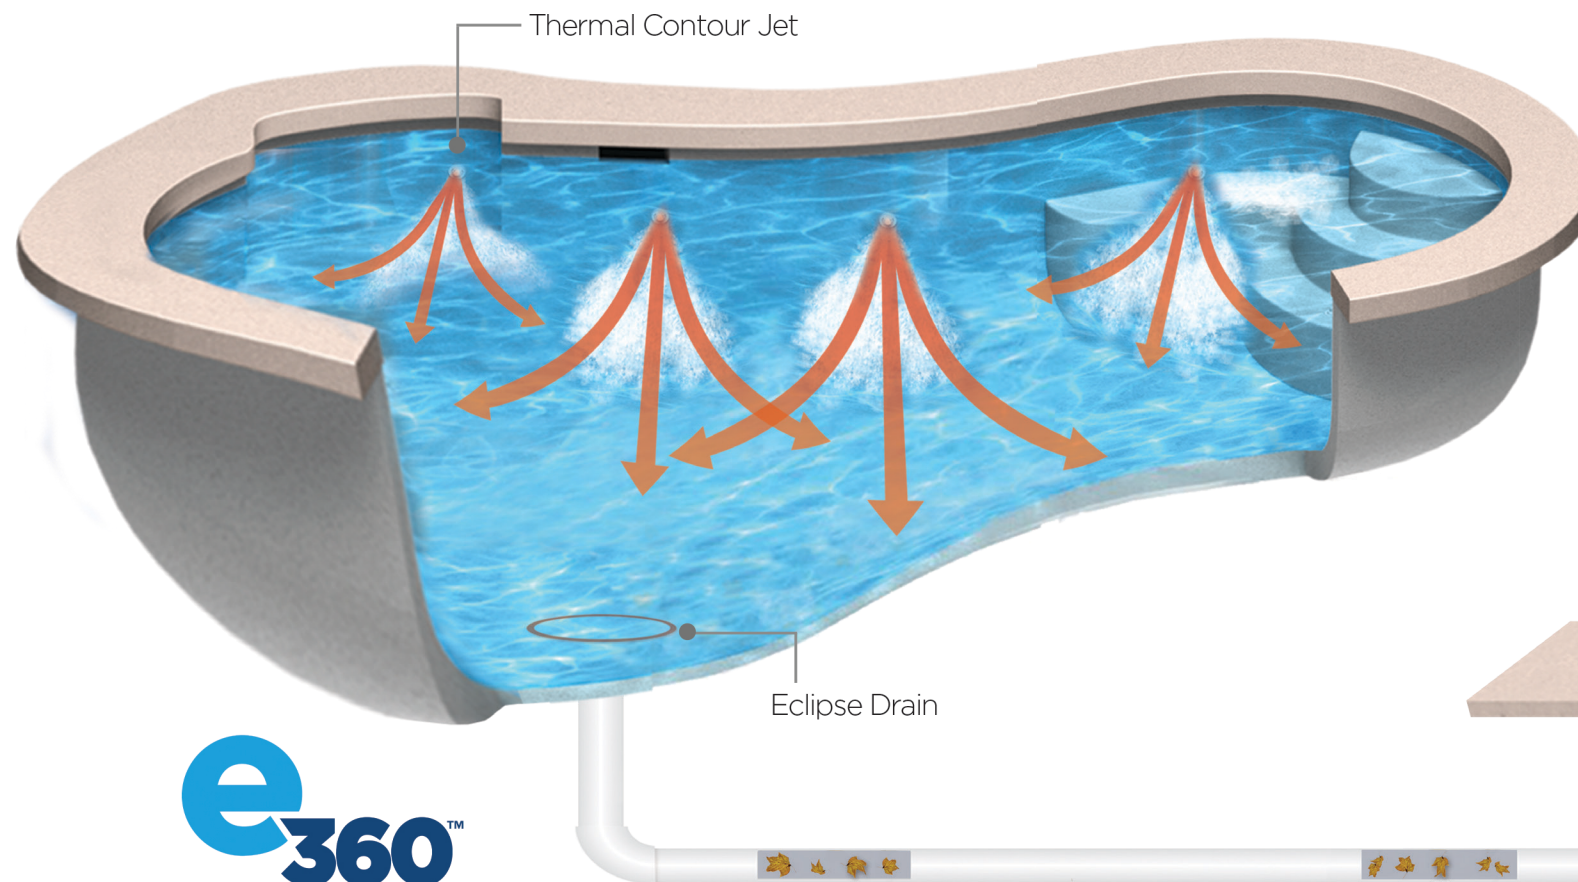

BLUE SQUARE

Pool circulation engineered for today's modern pool

E360 is an advanced pool circulation system engineered to maximize the efficiency of today's variable speed pumps. The Q360™ Water Valve and strategically placed Thermal Contour Jets™ work together to improve pool circulation and save on chemicals and energy every month. Add the Eclipse Drain™ and Abyss™ Canister to enhance dirt and debris removal.

Thermal Water Circulation Features & Benefits

- Reduces chemical and heat cost, up to 30%, for the life of the pool
- Sweeps dirt & debris from walls and help to clean steps
- Lengthens the swimming season
- Pushes warm water down and circulates the whole pool
- Eliminates the need for floor returns
- Smooth pressure changes for longer equipment life

Thermal Contour Jet delivers 3-directional Circulation

Eclipse Drain Single Source Suction
