

Abyss™

Containment Canister

HIGHER CAPACITY LESS MAINTENANCE

BOASTING A 14" DEEP BASKET, THE ABYSS CANISTER CAN HANDLE LARGE DEBRIS WITH EASE

With maximum debris storage capacity for swimming pool and spa debris, Abyss needs less frequent cleaning and maintenance than a typical installation. Abyss also is designed to push the heaviest debris to the bottom, increasing your pool's energy efficiency.

- By design, the heaviest debris is forced to the bottom.
- No interrupted water flow.
- No interference with your pool equipment.
- The lid gives you a clear view of what's inside.
- The 14 in. basket easily slides out and keeps debris contained in the process.
- Maximum efficiency at all times.
